In The
Memory
Of
Tom Sneed

I remember

- ... starting the first day of school for the last time and that queasy feeling in my stomach ...
- ... laughing so hard at Mr. Roberts' make-shift Christmas tree ...
- ... arguing with my teachers even when I knew they were right ...
- ... my sigh of relief when I saw I hadn't received the "D" I had expected on my report card ...
- ... laughing at the Senior Class Play, and being proud of being a senior ...
- ... realizing the changes in my friends over the years of schooling ...
- ... looking around at them the last time we were in the class room together ...
- ... the fading of the music from the Senior Prom into ... just memories ...
- ... the frightened feeling I had at graduation when I knew it was all over ...

The 1967-68 varsity basketball team took over where the team of last year left off, and gave the fans another exciting season. The team was underrated at the start of the season, but they proved that teamwork and determination play a major part in achieving success; and successful they were, compiling a fine fifteen and four record, and surprising everyone except Coach Sullivan, who knew their capabilities . . .

don't
TRUST
Anyone
over 5

You just can't trust people over five anymore. They may misinform you if they haven't kept up. Much knowledge is badly dated. The world changes fast. Nine out of every ten scientists and engineers who ever lived are alive and working today. Yesterday's fact is today's fallacy. Paper — and what is written on it — is transmitting

and recording the new discoveries in every field. At the Manchester Machine Company, we make machines that make paper, and our people are always learning. If you want the right answers, read what is current and make your own decisions.
